Support & Customization Help

## HELLO! PRO DOCUMENTATION

# INSTALLING THE HELLO! PRO THEME V2.0

Hello! Pro, a WordPress Personal Branding Theme from brandiD is built exclusively for the [Genesis Framework](#). If you have not yet purchased the framework, you can do that [here](#).

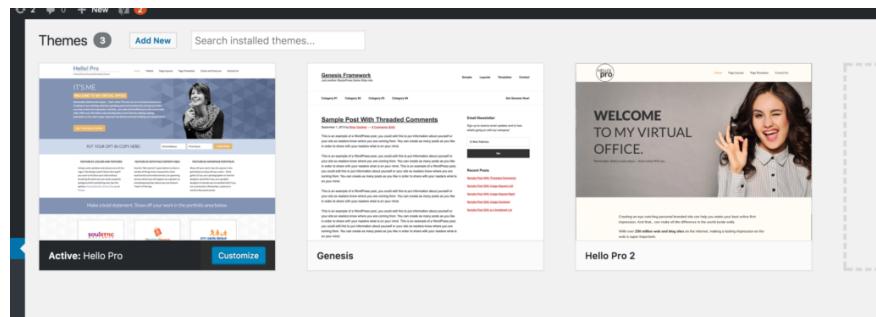

Here is a link for the [Hello! Pro theme demo](#) for your reference.

### Download Your Theme

Immediately after your purchase, you should receive a confirmation email with a download link. Your purchase of the Hello! Pro theme includes a file called **hello-pro-2.zip** this archive contains the theme files.

*Note: Updating from Hello Pro Version 1 to Version 2? Version 2 is a new theme and will not overwrite the original Hello Pro Version 1 theme if you have it installed.*

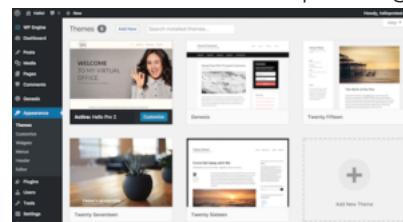

*If you have customized Version 1 of the theme, you will need to manually add those customizations to Hello Pro v2. Treat version 2 just like you would a new child theme for Genesis. In fact when you install Hello Pro v2, it will appear as a separate child theme.*

## How to Add and Remove Themes

1. **Install the Genesis Framework.** From your WordPress Dashboard go to Appearance > Themes. Click “Add New.” Click “Upload Theme.” Browse your computer to upload the file you purchased from StudioPress. You do not need to activate the Genesis Framework.
2. **Install Hello! Pro Theme.** From your WordPress Dashboard go to Appearance > Themes. Click “Add New.” Click “Upload Theme.” Browse your computer to upload the file called “**hello-pro-2.zip**.” Click “Activate” when the file is finished uploading.

*Please make sure that you have the most recent version of the theme. When this documentation was created, the theme version was 2.1.0. Your version should not be less than that – but may be greater if an update was released since this documentation was published. Not sure what version you have? The version number appears on the theme page after installation.*

3. **Update your permalinks (optional).** If you are creating a brand new site that has not been published yet, we recommend you set your permalinks to “Post Name”. If your site is already live and you’re just changing themes, you can skip this step. Changing your permalinks after your site is live can result in search engines not being able to find your content without reindexing the site and it can have short term negative effects on SEO rankings. Permalinks can be changed, but it involves redirecting the old URLs to the new URLs. That is outside the scope of this documentation. From your WordPress Dashboard go to Settings > Permalinks. For maximum search engine friendly-ness, we recommend the “Post Name” option (ie. <http://thebrandidthemes.com/sample-post/>) but configure as you wish for your site.

The following plugins are not necessary to use the Hello Pro theme, but we recommend these to get the maximum functionality out of your theme.

1. [Gravity Forms](#) – A paid premium plugin for making contact and opt-in forms. There are many free alternatives, but we feel this one is worth the investment.
2. [Simple Social Icons](#) – Used to make the social icons in the theme footer and sidebar and connect them to your social sites.
3. [Social Proof \(Testimonial\) Slider](#) – Rotates testimonials on the homepage.
4. [Genesis eNews Extended](#) – Easily add mailing lists integration to Hello Pro.
5. [Genesis Portfolio Pro](#) – Add a new “Portfolio” post type to easily show off your visual content.
6. [Display Posts Shortcode](#) – Adds portfolio items to the homepage widget areas.
7. [Optional: SVG Support](#) – A great plugin if you would like to upload the SVG file type for logos/images.

---

## FONTS

The fonts used in this theme are **Lato** and **Quicksand**, and are already included. You can also install them on your computer for future projects, but it is not required. [Get the fonts.](#)

---

## COLORS

The Hello! Pro theme uses two color pickers that can change the link color and the accent color. The demo color scheme is pre-set and no changes are necessary to use it. To change these colors, from your WordPress dashboard click on Appearance > Customize. Open the “Colors” menu. Choose the color options that you want to use and click “Save.”

---

**Link Color**  
Change the color of post info links, hover color of linked titles, hover color of menu items, and more.

Select Color

**Accent Color**  
Change the default hovers color for button.

Select Color

---

## SITE TITLE AND TAGLINE OR LOGO

The Hello theme comes with the option to use styled text for your site title and tagline or to upload a logo image of your choice. To use the text options, from your WordPress dashboard click on Appearance > Customize. Open the “Site Identity” menu. Enter your site title and tagline, then click “Save.” To use the logo option, from your WordPress dashboard click on Appearance > Customize. Click on the “Header Image” menu. Upload your logo file. The ideal logo size for the theme is 320px x 110px.

**Customizing Site Identity**

Site Title  
Hello!

Tagline  
A WordPress Personal Branding Theme

Site Icon

Site Icons are what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. Upload one here!

Site Icons should be square and at least 512 pixels.

No image selected

Select image

**Customizing Logo Image**

Click "Add new image" to upload an image file from your computer. Your theme works best with an image with a header size of 320 x 110 pixels — you'll be able to crop your image once you upload it for a perfect fit.

Current header

No image set

Add new image

## FRONT PAGE BACKGROUND IMAGES

The front page (also known as the Home page) has four image sections that you can customize. To upload your own images, just click on the Upload button.

Note: The image sections will appear in the Customizer when content is added to the front page widgets which are found in Appearance > Customize > Widgets.

**Front Page Welcome Section Image:**

[Remove](#) [Change image](#)

**Background Position Horizontal**  
Center

**Background Position Vertical**  
Center

**Front Page Call To Action Section Image:**

[Remove](#) [Change image](#)

**Background Position Horizontal**  
Center

**Background Position Vertical**  
Center

**Front Page Statement Section Image:**

[Remove](#) [Change image](#)

# WELCOME TO MY VIRTU OFFICE.

Memorable, distinct and unique -- that's what YOU are.

Creating an eye-catching person impression. And that... can make

Recommended photo images sizes:

**Welcome Section:** 1600px wide with a minimum height of 560px

**Call to Action Section:** 1600px wide with a minimum height of 280px

**Statement Section:** 1600px wide with a minimum height of 600px

**Testimonial Section:** 1600px wide with a minimum height of 800px

Note: These are just suggested sizes, but feel free to adjust them if your content layout is different.

**Background Horizontal Position:** Left, Center, Right

**Background Position Vertical:** Top, Center, Bottom

In our demo, we are using *center* for both positions.

**Sticky Header Navigation**

Customizing  
Sticky Header

Turn OFF the Sticky Header Navigation  
— (no "sticky" behavior)

Sticky header navigation that attaches itself to the top of your browser window as you scroll down. This is a great way to keep users from feeling lost as they browse your content, keep your logo and branding in sight, and it eliminates the need to return to the top of the page to access the menu items.

However, if you have very short pages that don't require much scrolling, or if you have modified the header to have a larger logo size, you may want to consider removing the "sticky" functionality. To do this, from your WordPress dashboard click on Appearance >Customize. Click on the "Sticky Header" menu and check "Turn OFF the Sticky Header Navigation".

## HOW TO SETUP WIDGETS LIKE THE DEMO SITE

### Import Demo Site Widget Settings (Optional)

For your convenience, an export file of the Hello! Pro 2 theme Demo site Widget Settings is available to assist in the setup of your theme. This file contains the widgets and their settings for the Demo site.

Before you begin, ensure you have installed the recommended list of [free plugins](#) and activated them first.

### DOWNLOAD THE WIE PLUGIN

You can use a free plugin called "[Widget Importer & Exporter](#)" to import all of our Demo site Widget Settings into your site.

### DOWNLOAD THE WIE FILE

Download the "WIE Setup File" for the Coaching Pro theme:

[Hello! Pro 2 Demo Site WIE Setup File](#)

### HOW TO IMPORT THE WIDGET SETTINGS

1. Ensure the "[Widget Importer & Exporter](#)" plugin is activated
2. Go to **Tools > Widget Importer & Exporter**

---

5. WordPress will import all the Demo site widgets and their settings into your site

You might not want your site to look exactly like our Demo. If you would like to setup your site your way, the next section includes instructions for setting up the widgets on the Hello! Pro 2 theme from scratch.

---

## WIDGET GUIDE

The homepage, and some other featured content areas of the site are made up of widget spaces. The image shows the names of each widget space and where it appears in the [theme demo](#). Also provided are the widget settings needed to make your site look like the theme demo. You can customize your widgets to best fit your brand.

[Home - Welcome](#)

**WELCOME  
TO MY VIRTUAL  
OFFICE.**

Memorable, distinct and unique -- that's what YOU are.

[Home - Intro](#)

Creating an eye-catching personal branded site can help you make your best online first impression. And that...can make all the difference in the world (wide web).

With over 250 million web and blog sites on the Internet, making a lasting impression on the web is super important.

Be distinct and start building your brand online!

[PURCHASE THEME](#)

[Home - Call to Action](#)

Put your opt-in copy here.

First Name  E-Mail Address

[TRY ME](#)

[Home - Features #1](#)

**Colors and Textures**

Unique color palettes and textures are all the rage in the design world. Down the road if you want to refresh your look without breaking the bank you can easily swap the background for something new.

**Feature #2:**

**Rotating Content**

Use the "Be Inspired" space below to share a variety of things from noteworthy client testimonials and endorsements, to upcoming venues where you will appear as a speaker to a breaking news bar where you can feature "news" of the day.

**Feature #3:**

**Homepage Portfolio**

Remember, a picture is worth a thousand words - so show off your work! Use the spaces in the grid below to showcase your gallery, brands or case studies.

[Home - Statement](#)

**MAKE A  
BOLD  
STATEMENT.**

[Home - Portfolio](#)

**SHOW OFF YOUR WORK.**

Use the spaces in the grid below to show off your work - think gallery, portfolio, or brands.

**Be Inspired.**

## HEADER RIGHT

Create a custom menu using the Appearance > Menus screen. Add a menu to the Header Right widget space using the Navigation Menu widget.

**Note:** When using the sticky header, it is recommended that you add your main navigation to the header right widget area. If you enable the menu location for Primary Navigation Menu (in the menu settings), we recommend you turn off the sticky header – as the menu will not be in the header area.

This is the header widget area. It typically appears next to the site title or logo. This widget area is not suitable to display every type of widget, and works best with a custom menu, a search form, or possibly a text widget.

**Navigation Menu**

Title:

Select Menu:

[Delete](#) | [Done](#)

[Reorder](#) [+ Add a Widget](#)

## HOME – WELCOME

Insert a text widget into the Home – Welcome area to display establishing text.

Customizing > Widgets

## Home - Welcome

Introduce yourself! Welcome visitors to your homepage by using a text widget in this space with up to 200 characters of establishing copy.

**Text**

Title:

Add Media Visual Text

b i link ul ol li code

```
<div class="text-left">
<h2><strong>Welcome</strong> to
my Virtual Office.</h2>
<p>Memorable, distinct and
unique -- that's what YOU are.
</p>
</div>
```

[Delete](#) | [Done](#)

[Reorder](#) [+ Add a Widget](#)

<h2></h2> tags around the headline text. To bold the text, use <strong></strong> tags around the text.

To limit the area the text covers (if you have a background photo with content on the right side) wrap the text in a div with class "text-left".

## HOME – INTRO

Add text to the intro widget with a text widget. To add a button to any widget area, use the class "button".

Remember, to add HTML, click the "Text" tab at the top of the editor.

Setup your message. Add a few brief teaser sentences here, to keep users scrolling further down the Homepage.

**Text**

[Remove](#) | [Done](#)

[Reorder](#)

[Add a Widget](#)

## HOME – CALL TO ACTION

This widget area is set up for the Genesis eNews Extended plugin. Install the plugin according to the plugin directions. Set the form to only use a first name and email address. Put the text in the field labeled “Text To Show Before Form:”

Alternatively, if you have opt-in embed code, you can also use a text widget in the space. The text in our theme demo uses the class “enews”  
`<div class="enews">FORM</div>`.

## HOME – FEATURES

offerings, or other featured content. It is designed as a three column widget. In our demo we used three Custom HTML widgets, but these three spaces could accommodate any widget type.

text, recent posts, or page excerpts. We recommend highlighting three services, products, or features of your business, practice, or organization.

Custom HTML	▼
Custom HTML	▼
Custom HTML	▼

[Reorder](#) [+ Add a Widget](#)

```
widget-title">
<span>Feature #1:</span>
Colors and Textures</h3>
2 Unique color palettes and textures are all the rage in the design world. Down the road if you want to freshen your look without breaking the bank you can easily swap the background for something new.
```

[Remove](#) | [Done](#)

The theme is prebuilt to style the following: `<h3 class="widgettitle widget-title"><span>Orange Feature Headline</span> Black Bolded Headline</h3>`

## HOME – STATEMENT

Use a text widget with `<h2></h2>` tags to style the text like the demo. Try other heading types or paragraph tags for other looks or to accommodate a larger amount of text. To restrict the text to the left side (useful if you have a background image with content on the right) wrap the text in a div with class “text-left”: `<div class="text-left"></div>`

## HOME – PORTFOLIO

The homepage portfolio area is designed to use the [Display Posts Shortcode](#) to pull featured images from existing portfolio items (created with the [Genesis Portfolio Pro](#) plugin).

Create portfolio items with assigned featured images before configuring these areas.

The portfolio items can be added to this widget using shortcode (see screenshot).

Customizing > Widgets

## Home - Portfolio

Show off your work. Use featured images to pull 3, 6, or 9 portfolio items into this homepage feature area. Also works with posts or pages.

**Text:** Show off your work.

**Title:** Show off your work.

**Add Media** Visual Text

**b** **i** **link** **ul** **ol** **li** **code**

Use the spaces in the grid below to show off your work - think gallery, portfolio, or brands.  
[display-posts post\_type="portfolio" posts\_per\_page="6" image\_size="full" order="ASC"]

[Remove](#) | [Done](#)

[Reorder](#) [+ Add a Widget](#)

## HOME – TESTIMONIAL

This is a full-width widget space which can accommodate a text widget, but we recommend using our [Social Proof \(Testimonials\) Slider](#) plugin to rotate quotes or testimonials in this space.

[Home](#) [Shop](#) [Support](#) [Register](#) [Login](#)

## FOOTER

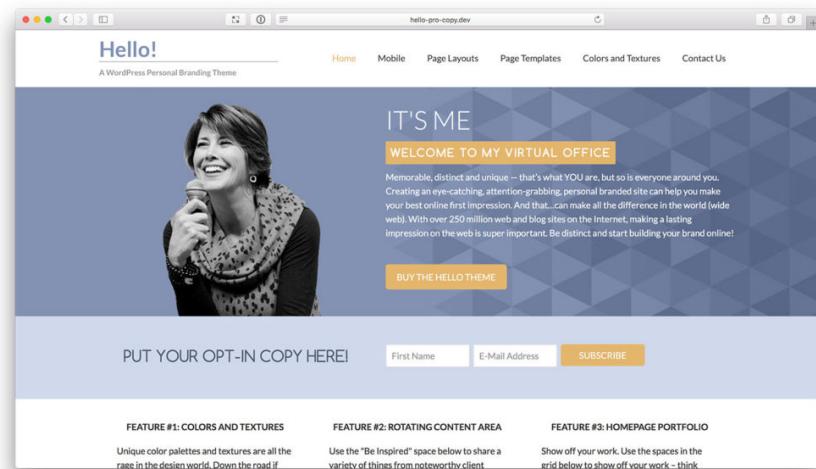

The site footer can be editing in a number of ways. We recommend using the Genesis Simple Edits plugin by going to Genesis > Simple Edits.

Note: When you first install the plugin, be sure to visit the plugin settings page and save changes. This will force the site footer to be visible again.

## HELLO! PRO DOCUMENTATION V1.X

This is the documentation for Hello! Pro version 1.x.

Hello! Pro, a WordPress Personal Branding Theme from brandiD is built exclusively for the [Genesis Framework](#). If you have not yet purchased the framework, you can do that [here](#).

Hello! Pro theme demo is [here](#) for your reference.

### Download Your Theme and Extras

Immediately after your purchase, you should receive a confirmation email with a download link. Your purchase of the Hello theme includes a file called **hello-pro.zip** this archive contains the theme files. Also available for download are the [Theme Extras](#) which contain Photoshop design files and the theme fonts.

theme upload

[How to Add and Remove Themes](#)

Click "Upload Theme."

Browse your computer to upload the file you purchased from StudioPress.

You do not need to activate the Genesis Framework.

## 2. **Install Hello Pro Theme.**

From your WordPress Dashboard go to Appearance > Themes.

Click "Add New."

Click "Upload Theme."

Browse your computer to upload the file called "hello.zip."

Click "Activate" when the file is finished uploading.

*Please make sure that you have the most recent version of the theme. The current version is 1.5.1. Not sure what version you have? The version number appears on the theme page after installation.*

## 3. **Update your permalinks.**

From your WordPress Dashboard go to Settings > Permalinks. For maximum search engine friendly-ness we recommend the "Post Name" option (ie.

<http://thebrandid.com/sample-post/>) but configure as you wish for your site.

---

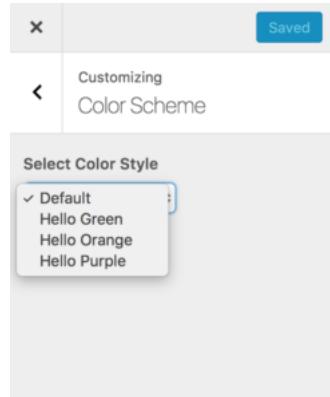

## Plugins to Install

The following plugins are not necessary to use the Hello Pro theme, but we recommend these to get the maximum functionality out of your theme.

1. [Gravity Forms](#) – a paid premium plugin for making contact and opt-in forms. There are many free alternatives, but we feel this one is worth the investment.
2. [Recent Posts Widget Extended](#) – This plugin is recommended for using the homepage portfolio area.
3. [Simple Social Icons](#) – Used to make the social icons in the theme footer and sidebar and connect them to your social sites.
4. [Social Proof \(Testimonial\) Slider](#) – Rotates testimonials on the homepage.
5. [Black Studio TinyMCE Widget](#) – Visual Editor for widget spaces.
6. [Genesis eNews Extended](#) – Easily add mailing lists integration to Hello Pro.

## Theme Colors and Textures

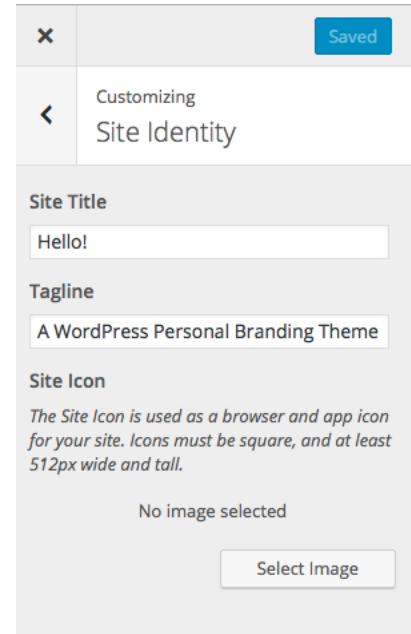

The Hello theme comes with four color and texture combinations. The grey color is the default and no changes are necessary to use this color scheme. To use the orange, purple, or gray options, from your WordPress dashboard click on Appearance > Customize. Open the "Color Scheme" menu. Choose the color option that you want to use and click "Save."

## Site Title and Tagline or Logo

The Hello theme comes with the option to use styled text for your site title and tagline or to upload a logo image of your choice. To use the text options, from your WordPress dashboard click on Appearance > Customize. Open the "Site Identity" menu. Enter your site title and tagline, then click "Save."

To use the logo option, from your WordPress dashboard click on Appearance > Customize. Click on the "Header Image" menu. Upload your logo file. The ideal logo size for the theme is 320px x 110px.

## Sticky Header and Navigation

The Hello! Pro theme features a "sticky" header navigation that attaches itself to the top of your browser window as you scroll down. This is a great way to keep users from feeling lost as they browse your content, keep your logo and branding in sight, and it eliminates the need to return to the top of the page to access the menu items.

While you can crop images to your liking after clicking **Add new image**, your theme recommends a header size of **320 × 110 pixels**.

**Current header**

No image set

[Add new image](#)

you may want to consider removing the “sticky” functionality. The sticky navigation can be found in the `functions.php` file on line 84.

Remove the entire function as shown in the snippet below.

```

1  /* Sticky Navigation for Header Right Menu
2  add_action( 'wp_enqueue_scripts', 'hello_pro_add_sticky_nav_script'
3
4
5  global $wp_registered_sidebars;
6  if ( isset( $wp_registered_sidebars['hea
7      wp_enqueue_script( 'sticky-nav-scrip
8
9
10 }
```

[function.php hosted with ❤ by GitHub](#) [view raw](#)

You should also edit the theme's `style.css` file, locate the following block and remove “`position: fixed;`” from it.

```
.site-header {
display: block;
position: fixed;
z-index: 1;
}
```

## Widget Guide

The homepage, and some other featured content areas of the site are made up of widget spaces. The image shows the names of each widget space and where it appears in the [theme demo](#). Also provided are the widget settings needed to make your site look like the theme demo. You can customize your widgets to best fit your brand.

The screenshot illustrates the layout and widget placement for the Hello! Pro theme. Key areas include:

- Header Area:** Home - Welcome Widget Area (top left), Home - Image Widget Area (top right).
- Content Area:** Home - Call to Action Widget Area (left), Home - Features Widget Area (center-left), FEATURE #1: COLORS AND TEXTURES (center), FEATURE #2: ROTATING CONTENT AREA (center-right), FEATURE #3: HOMEPAGE PORTFOLIO (right).
- Portfolio Area:** Home - Headline Widget Area (top), Home - Portfolio Widget Area (left), MAKE A BOLD STATEMENT, SHOW OFF YOUR WORK IN THE PORTFOLIO AREA BELOW (center).
- Testimonial Area:** Home - Testimonial Widget Area (left), BE INSPIRED (center), "All of us need to understand the importance of branding. We are CEOs of our own companies: Me Inc. To be in business today, our most important job is to be head marketer for the brand called You." - Ben Peters (center).
- Footer Area:** CONTACT (left), 724-555-0123, info@thebrandidthemes.com | Get Directions (left), CONNECT WITH US (center), Add and customize up to 15 major social media icons using the "Simple Social Icons" plugin. Why better than to expand your personal brand than through the "smart" use of social media? (center), LAST CHANCE OPT-IN (right), Give users one more chance to join your mailing list!, Email Address (input field), First Name (input field), SUBSCRIBE (button) (right).
- Footer Widgets:** Footer 1 Widget Area (bottom left), Footer 2 Widget Area (bottom center), Footer 3 Widget Area (bottom right).

## Header Right

Create a custom menu using the Appearance > Menus screen. Add a menu to the Header Right widget space using the Custom Menu widget.

```
[siteorigin_widget class="SiteOrigin_Widget_Image_Widget"]
[/siteorigin_widget]
```

## Home – Welcome

The screenshot shows a WordPress visual editor window. At the top, there's a title field labeled "Title:" with a placeholder "Text". Below it is a content rich-text area containing the following HTML code:

```
<h1>It's Me</h1>
<span class="highlight">Welcome to My Virtual Office</span>
<p>Memorable, distinct and unique — that's what YOU are, but so is everyone around you. Creating an eye-catching, attention-grabbing, personal branded site can help you make your best online first impression. And that...can make all the difference in the world (wide web). With over 250 million web and blog sites on the Internet, making a lasting impression on the web is super important. Be distinct and start building your brand online!</p><a href="/layouts/cs/" class="button">Learn More</a>
```

Below the rich-text area, there's a checkbox labeled "Automatically add paragraphs" and two buttons at the bottom: "Delete | Close" and a blue "Save" button.

Insert a text widget into the Home Welcome area to display establishing text.

Two text styles have been pre-designed for use in this area. To get the large all uppercase text, use `<h1></h1>` tags around the headline text. For the text with the background color block use `<span class="highlight"></span>` To add a button to any widget area, use the class “button”.

To style the widget spaces with a visual editor instead of HTML, consider this plugin [Black Studio TinyMCE Widget](#)

## Home – Image

Insert any image using the visual editor widget or an HTML image tag. For best results use a transparent PNG image 315px x 380px.

## Home – Call to Action

Paste your opt-in embed code in a text widget to use this space. The text in our theme demo uses the class “optin”

```
<span class="optin">PUT YOUR OPT-IN COPY HERE!</span>
```

Version 1.2.0 of the Hello Theme now also supports the Genesis eNews Extended plugin. Install the plugin according to the plugin directions. Set the form to only use a first name and email address. Put the text to the left of the form in the field labeled “Text To Show Before Form:”

---

highlight services, offerings, or other featured content. In our demo we used three text widgets, but these three spaces could accommodate any widget type.

#### Home - Features

This is the 3 features sections of the home page.

Text: Feature #1: Colors and Te...

Text: Feature #2: Rotating Cont...

Text: Feature #3: Homepage Po...

---

#### Home – Headline

Use a text widget with `<h1></h1>` tags to style the text like the demo. Try other heading types or paragraph tags for other looks or to accommodate a larger amount of text.

---

#### Home – Portfolio

The homepage portfolio area is designed to pull featured images from existing posts or portfolio items. This can be configured in many ways, but we recommend the [Recent Posts Widget Extended](#) plugin to make the most of these widget areas.

Create posts or portfolio items with assigned featured images before configuring these areas.

Use the settings in the screenshot to set up six portfolio items.

Title URL	Post Types	Offset
<input type="text"/>	<input type="checkbox"/> Posts <input type="checkbox"/> Pages <input type="checkbox"/> Media <input checked="" type="checkbox"/> Portfolio <input type="checkbox"/> Testimonials	0 The number of posts to skip
CSS ID	<input checked="" type="checkbox"/> Display Thumbnail Thumbnail (height,width,align) 200 <input type="button"/> 300 <input type="button"/> Center <input type="button"/>	
CSS Class		
HTML or text before the recent posts	Post Status	Default Thumbnail
<input type="text"/>	Publish <input type="button"/>	<a href="http://placehold.it/45x45/f0f0f0/c">http://placehold.it/45x45/f0f0f0/c</a> Leave it blank to disable.
HTML or text after the recent posts	Order	<input type="checkbox"/> Display Excerpt
<input type="text"/>	Descending <input type="button"/>	
Orderby	Excerpt Length	<input type="checkbox"/> Display Readmore
Date <input type="button"/>	10 <input type="button"/>	
Limit to Category	Readmore Text	<input type="checkbox"/> Display Comment Count
<input type="checkbox"/> Category #1 <input type="checkbox"/> Category #2 <input type="checkbox"/> Category #3 <input type="checkbox"/> Category #4 <input type="checkbox"/> Category #5	<a href="#">Read More »</a>	<input type="checkbox"/> Display Date
Limit to Tag	Limit to Taxonomy	<input type="checkbox"/> Display Modification Date
<input type="checkbox"/> Blockquotes <input type="checkbox"/> Headlines <input type="checkbox"/> Images Centered <input type="checkbox"/> Images Left <input type="checkbox"/> Images Right	<input type="text"/> Ex: category=1,2,4&post_tag=6,12 Available: category, post_tag, post_format, portfolio-type	<input type="checkbox"/> Use Relative Date. eg: 5 days ago
<input type="checkbox"/> Use Default Styles <b>Custom CSS</b> <pre>.rpwe_widget { margin-bottom: 30px; }  .rpwe-li { width: 33.3%; float: left; }</pre> <p>If you turn off the default styles, you can use these css code to customize the recent posts style.</p> <p><a href="#">Delete</a>   <a href="#">Close</a> <span style="float: right;"><b>Save</b></span></p>		

Note: For versions of the theme prior to version 1.4.0 please add this code to the "Custom CSS" field in the plugin. It is not needed in the newest version.

```

1  .rpwe_widget {  
2    margin-bottom: 30px;  
3  }  
4  
5  .rpwe-li {  
6    width: 33.3%;  
7    float: left;  
8  }  
9  
10 .rpwe-title {  
11   display: none;  

```

```
17 width: 300px;  
18 float: none;  
19 margin: 0 auto 0;  
20 clear: both;  
21 }  
22 }
```

CSS for Homepage Portfolio hosted with ❤ by GitHub

## Footer

### Footer Widgets 1, 2, and 3

Social icons can be configured in any of the widget spaces including the primary sidebar or any of the footer widgets. The demo uses the [Simple Social Icons](#) plugin with the following settings.

### Footer Copyright Text

The footer code can be found in the function.php file. The function that you need to customize the standard Genesis footer is already included in the child theme. It looks like this...

```
1  /* Customize footer
2  remove_action( 'genesis_footer', 'genesis_do_footer' );
```

You can keep or remove anything inside the paragraph tags, without actually modifying the function, but please make a backup of your site before doing so as changes to the theme code can cause errors.

You can find more information about [custom Genesis footers in the StudioPress documentation](#).

## SUPPORT & CUSTOMIZATION HELP

Thank you for using our theme! Please make sure you always check your specific theme documentation and our [support page](#) prior to reaching out. For any suspected bug, we ask that you provide as much information as possible (ie the screen size at which the error occurs, your site URL, and the browser you are using).

Please note that we can not manage support requests by phone. If your request meets the [guidelines for support](#), please use this form, and we will respond as quickly as possible.
